PROFILE

I'm a full-stack web developer who enjoys building complete web applications, both front-end and back-end. I'm detail oriented, quick to adapt, and love solving problems I'm always learning, and I'm looking for a role where I can grow as a developer and contribute to real-world products

EDUCATION

SHIVALIK COLLEGE OF ENGINEERING

Bachelor of Technology (Hons)

Cumulative GPA: 8.1/10.0

Dehradun, India

October 2021 – June 2025

ST. MARY'S CONVENT SCHOOL (CBSE BOARD)

Class X : 94.2%

Class XII : 92.4%

Dehradun, India

2018 – 2019

2020 – 2021

PROJECTS

AI Enabled ATS: TalentGPT | [Live Demo](#) | [GitHub](#)

- Developed an advanced full-stack web application using the MERN stack (MongoDB, Express, React, Node.js) featuring a modern, interactive JavaScript interface.
- Leveraging **Azure AI** services alongside cloud infrastructure to orchestrate high-accuracy resume parsing.
- Integrated the Google **Gemini API** to run context-aware candidate screenings, analyze skill alignments, and generate talent insights.
- Constructed a dashboard for both employers and employees to seamlessly access, filter, and refine resume selections.
- Programmed a **data-anonymization** routine to strip out personal details prior to screening, actively reducing bias in the initial review phase.

Multimodal AI Summarizer: NeuroDigest | [Live Demo](#) | [GitHub](#)

- Created a responsive multi-page React application powered by a suite of cloud-hosted **Azure AI** Services.
- Connected **Azure Computer Vision** (OCR) and **Azure Speech-to-Text** to transcribe vocal tracks and extract text data from images.
- Managed multipart form data and file uploads from the frontend to the backend engine using **Multer middleware**.
- Secured backend API routing protocols against malicious traffic using **Helmet** and **Express Rate Limiter**.

Full-Stack Blogging Platform: sMv|Blog | [Live Demo](#) | [GitHub](#)

- Programmed complete **CRUD** functionality, enabling authenticated users to register accounts, set up profiles, and share their LinkedIn and GitHub links with rate limiting to prevent abuse.
- Implemented a secure user authentication system, integrating a serverless **Google Apps Script** microservice to handle multi-factor email OTP generation and verification alongside standard credentials.
- Implemented post-management logic allowing users to write content using the **TinyMCE** Rich Text Editor and toggle posts between active and inactive public states.
- Connected the Node.js backend to **Azure Blob Storage** for managing blog image uploads

Skills & Certifications

Languages: JAVASCRIPT, C/C++, HTML, CSS.

Frameworks & Libraries: MERN, EJS

Tools: Mongo DB Server, Azure

Certifications & Training: Azure AI Fundamentals
